

Honda Seeley 750

Honda Seeley 750

The 1977 Honda Seeley 750 is a unique blend of Japanese reliability and British engineering excellence. Designed by the renowned Colin Seeley, this motorcycle integrates the powerful Honda CB750 engine into a lightweight and race-inspired Seeley frame, resulting in significantly improved handling and performance.

This particular Seeley 750 has 34,480 km on the clock and comes with Dutch registration papers. However, it is no longer listed in the current registration database. Additionally, it includes original documentation on Seeley's engineering work, adding historical value to this rare collector's piece.
